

Ryan Tran

Atlanta, GA | 678-670-9868 | concepting@protonmail.com | linkedin.com/in/RyanTren/ | github.com/RyanTren

SKILLS

Languages: Python, C#, Java, TypeScript, JavaScript, SQL

Frameworks: .NET (Core, ASP.NET), Angular, React, Next.js, Node.js

Tools & Platforms: Docker, Azure DevOps, GCP, Firebase/Supabase, Git, Ranorex, Postman

EXPERIENCE

Software Development Intern

June 2026 – Present

Milliman

Chicago, IL

- Developed and shipped a full-stack web application using **C#, .NET, React, TypeScript**, and **SQL Server**, supporting internal business workflows.
- Refactored and extended dependency-injected REST APIs following **SOLID** and **TDD**, improving backend maintainability and reducing defect risk.

Software Engineer Co-op

May 2025 – May 2026

INPO (Institute of Nuclear Power Operations)

Atlanta, GA

- Delivered **50+** full-stack features and bug fixes for mission-critical nuclear applications, enhancing UI/UX, system reliability, and internal workflows using **C#, .NET, Angular, TypeScript**, and **SQL Server**.
- Modernized **2** enterprise applications by migrating from **Angular 13 → 20 LTS** and **.NET Core 6 → 10 LTS**, while improving **CI/CD** build and deployment pipelines, resolving dependency conflicts, remediating security vulnerabilities, and replacing deprecated component libraries to stabilize production systems.
- Implemented rapid hotfixes for production issues and actively participated in Agile ceremonies (release windows, standups, sprint planning, retrospectives), improving team velocity and ensuring timely delivery of high-priority fixes.
- Expanded automated test coverage by **45%+** by developing E2E, regression, and API test suites with **Ranorex**, **Postman**, and **Swagger**, proactively identifying critical defects pre-release and reducing manual QA effort across **3** applications in **Azure DevOps**.

Software Engineer Intern

Sep. 2024 – Dec. 2024

Aayats (Techstars FW'24)

Atlanta, GA

- Developed and optimized an audio analysis **ML pipeline** to predict musical attributes from MP3 files using **Librosa**, integrating outputs with an **Airtable-backed data system**.
- Engineered a feature extraction pipeline generating **15+** spectral and temporal audio features, enabling high-quality dataset creation for model training and evaluation.
- Accelerated model experimentation by streamlining fine-tuning workflows with **Hugging Face Transformers** and **Unsloth**, improving iteration speed and customization of pretrained models.

Software Engineer Fellow

Jul. 2024 – Sept. 2024

Headstarter AI

Long Island City, NY

- Released **5 AI web apps** using **Next.js, Firebase, OpenAI API, Clerk API, Stripe API**, and **Vercel**.
- Led **4 Software Engineers** across 3 projects and scaled each app to **200+ users** with user feedback.

PROJECTS

Financial Risk Management Calculator/Dashboard | *React, .NET Core, TypeScript, C#, EF Core, & PostgreSQL*

- Built a full-stack risk management platform implementing VaR and stress tests with **.NET Core, EF Core**, and **PostgreSQL**.

ATS Compliant Resume Generator SaaS | *Next.js, TypeScript, Claude/OpenAI API, Stripe, Supabase*

- Developed an LLM-powered resume generation SaaS using **Next.js & OpenAI API** to generate tailored resumes and cover letters.

EDUCATION

Kennesaw State University

Bachelor of Science in Computer Science

Marietta, GA

Graduated Magna Cum Laude May 2026
